SERVING ARCHITECTS, CONTRACTORS, AND OWNERS IN COMMERCIAL CONSTRUCTION

MARCH 2018 Vol. 16 No. 3

Scene-control solution

Ratio is said to be an easy-to-use, easy-to-install architectural solution for scene control and has three components: a Flat sensor, small power supply, and matchbook-size pushbutton controller. The device controls as many as 35 LED fixtures. Scenes use Bluetooth programming.

LED area light

The LED small MT area light has applications in site, area, parking, walkways, and general lighting. The fixture is available in 40, 60, and 80 W for replacements to 200-W high-pressure sodium fixtures. The lightweight luminaire can be customized with several mounting options and has a tempered-glass lens.

Water-proof, pressure-proof luminaire

Tri-Proof lights are water-, pressure-, and dust-proof luminaires that replace traditional linear fluorescents. Rugged and resistant to heavy impacts, applications include factories, warehouses, and parking garages. A range of color temperatures is available.

Trimless, flush-mount additions

Additions to the lolite series of modular LED downlights include trimless and flush-mount models. The trimless version has no exposed flange and does not extend below the ceiling plane. The flush mount has a visible round- or square-trim flange. Color temperatures for each range from 2700 to 5000 K.

Pop-up power dock

The PCS64 press-to-pop-up power dock provides three power outlets. The tower has an LED-powered trim ring, making it easy to spot when closed. Installation in reportedly any type of furniture is through a 3 3/4-in. hole, dropped in from the top and tightened underneath with a locking ring.

Compact high bay

The HP series LED high-bay pendant provides high output illuminations for large-scale interiors. Available in a full range of wattages, the luminaire provides 28,500 lumens with reported minimal glare and measures less than 14 in. in diameter. It is a direct replacement for 175- to 600-W metal-halide or HID fixtures.
