Parking Lots & Garages Solution

Parking Garage | Canopy | Wall Pack | Flood Light | Area Light

START **SAVING**

Our comprehensive suite of lighting offerings include:

- 1** LED Parking Garages & Canopy
- 2** LED Wall Pack
- 3** LED Flood Light
- 4** LED Area Light

LED Parking Garages & Canopy

LED Canopy
& Parking Garage Lights

LS Parking Garage

LED PAD Gas
Station Canopy

- The LS series parking garage lights are the high-performance solution for the most demanding applications within a patented air cooling design. With an expected service life of 100,000 hours and an easy-install design, it provides an affordable initial cost and low total cost of ownership. With high lumen packages and precision refractive optics, the LS series can meet superior illumination performance requirements.

The Pad series is ideal for the applications such as gas station canopy, low bay application, truck stops and drive through at banks and restaurants. Its unique patent air cooling design for no ponding water and dusk. The Ultra-slim body is as slim as 1.58". Two installation options as pendant and surface.

Security Light

LED Security Light

- LED Full Cut-off LED Wall Packs are designed and engineered as maintenance free, energy efficient alternatives to traditional fluorescent, high/low pressure sodium, metal halide, induction, and other types of lighting fixtures.

LED Standard LED Wall Packs with new optics increase light output and efficacy to reduce shadows and create safe, brightly-lit outdoor environments in parking garages, entrances, public areas and all other outdoor areas in a retail setting.

LED V-Line & Slim Wall pack are designed high quality die cast housing. Durable chip and fade resistant powder coat finish. Efficient design separates the driver from the LED to minimize heat, air cooling design of aerodynamic and modern appearance. Adjustable head for precise aiming.

Low Wattage LED Slim Wall Packs are designed and engineered as maintenance free, energy-efficient alternatives to traditional fluorescent, high/ low pressure sodium, metal halide, induction, and other types of lighting fixtures. Superior thermal design for longer life.

Leopard Series Mini Wall Pack series is designed to replace 70-150W MH luminaires while saving up to 88% in energy costs. The leopard series can be customized for virtually flood light and wall pack lighting application. This series is ideal for outdoor applications such as building perimeters, loading areas, driveway's, sign and building flood lighting.

The ABOVE ALL LED Security Lights are the ideal fixture for entrance ways, stairways, and storage areas. Featuring a classic form as well as a new modern form option which offers a unique appearance, both are powered by advanced LEDs. The ABOVE ALL LED Security Lights are powerful yet energy efficient, capable of replacing up to a 100W HID light source while saving energy costs. Integral Photocell is preinstalled for more efficient operation and energy savings.

Leopard Series Mini Flood Light

3

LED High Wattage Flood Light use die-casting aluminum housing, simple but beautiful. It is designed to replace the halogen, sodium and MH floodlight with long lifespan, high brightness output and stable quality. High Quality Outdoor Powder Coat Finish. Ultra efficient LED and optical design.

LED V-Line flood light series creates a powerful, customizable tool for implementing a designer's vision for nighttime facade lighting. With the ability to create extraordinary designs specific to the site, this powerful luminaire is extremely versatile for all outside garage lighting applications. It uses a die-casted aluminum housing, aerodynamic, and modern design. It is ideal to replace a halogen, sodium and metal halide light sources. High Quality Outdoor Powder Coat Finish.

LED Flood Light use die-casting aluminum housing, simple but beautiful. It is designed to replace the halogen, sodium and MH floodlight with long lifespan, high brightness output and stable quality.

LED Mini Flood Light Narrow Beam 70 Degree use die-casting aluminum housing, simple but beautiful. It is designed to replace the halogen, sodium and MH floodlight with long lifespan, high brightness output and stable quality. High Quality Outdoor Powder Coat Finish. Ultra efficient LED and optical design. Replaces 150W MH floodlights.

LED Mini Flood Light Wide Beam 110 Degree use die-casting aluminum housing, simple but beautiful. It is designed to replace the halogen, sodium and MH floodlight with long lifespan, high brightness output and stable quality.

The Model-T LED is a universal and scalable outdoor LED luminaire. The Model-T LED can be customized for virtually any type of outdoor lighting application by applying one of several different mounting options to a universal body to create an Area, Flood or Wall Pack luminaire. Four installation methods including Trunnion/Yoke Slip fitter, Wall mount and Pole mount. The Model-T LED is a scalable indoor/outdoor High Bay pendant mount LED luminaire. The Model-T LED can be customized for standard on off wall switching, on/off motion sensor switching or multi level motion sensor switching. The Model-T LED also comes standard with 0-10V control.

The leopard series is designed to replace 70-150W MH luminaires while saving up to 88% in energy costs. The leopard series can be customized for virtually any flood light lighting application. This series is ideal for garage applications such as building perimeters, loading areas, signage and building facade flood lighting.

LED Area Light

The Model-T LED is a universal and scalable parking area LED luminaire. LED Model-T series is designed as a modern and aesthetically pleasing lighting system that offers high uniformity, excellent symmetric light distribution, reduced offsite visibility and on-site glare. It uses a diecasted aluminum housing and aerodynamic design. High quality outdoor powder coat finish.

The ABOVE ALL Area Lights are ideal for parking areas and other applications that require high quality energy efficient lighting. In 55W, 80W, 110W, 135W, and 300W replaces 70W to 1000W of Metal Halide and High Pressure Sodium light sources. Maintenance free and an extreme long life of 135,000 hours (L70).

The ABOVE ALL Roadway series is the result of a multi-disciplinary design study and applies the latest technologies developed by ABOVE ALL Engineers. The product's reliability and performance where the design motivation for the series and the results have been verified and tested by third party independent certified laboratories. The ABOVE ALL Technology provides significant advantages in terms of luminous efficiency, minimizing losses from refraction and reflection inside the optical system. This system ensures a lower density of dirt and maintaining the luminaire performance for a very long period.

Notes

SAVING **EXAMPLE**

Ref#: 10432-10120

Energy Savings:

At \$0.10 per kWh, energy savings is estimated at \$90 per fixture, based on saving approximately 200 Watts per fixture for 12 hours per day. If your facility has 48 canopies (conservative for many parking garages), this annualized savings would be \$4,320.

Maintenance Savings:

The average cost to maintain a typical outdoor fixture is \$100 (lamp cost + labor/trip charge). This does not factor in any inconveniences or service interruptions caused by unlit areas. Over the extended 100,000 space rated life of an LED fixture compared with an HID lamp, this saves approximately \$500 per fixture in labor. $48 \text{ fixtures} \times \$500 = \$24,000$.
