ENERGY COST SAVING

LED is a highly energy efficient lighting technology, and has the potential to fundamentally change the future of lighting in the United States. LEDs use at least 75% less energy, and last 25 times longer, than traditional lighting. Widespread use of LED lighting has the greatest potential impact on energy savings in the United States. By 2027, widespread use of LEDs could save about 348 TWh (compared to no LED use) of electricity: This is the equivalent annual electrical output of 44 large electric power plants (1000 megawatts each), and a total savings of more than \$30 billion at today's electricity prices.

MAINTENANCE SAFETY

	Estimated Life (Years)	Maintenance Cycles
LED	30+	N/A
HID	2	15
Fluorescent	1	30
Incandescent	0.5	60
Quartz	0.75	40

Why choose us?

ABOVE ALL, a leader in R&D, manufacturing and customization of LED indoor and outdoor light fixtures, is focused on serving the commercial and industrial markets with a commitment to design and manufacturing excellence. ABOVE ALL's Toms River, New Jersey headquarters serves as our main distribution warehouse, sales office and showroom. ABOVE ALL enjoys a massive manufacturing base with 600,000sf ISO9001 and ISO14001 certified factory in Asia to ensure the high quality of our products.

ABOVE ALL is a high-tech green energy company that is committed to the environment as well as using the latest technology. ABOVE ALL uses the latest LED, thermal, optical and control components in our products.

START **SAVING**

Our comprehensive suite of lighting offerings include:

- 1** LED Downlight
- 2** LED Troffer/ LED Troffer Retrofit Kit
- 3** LED Flat Panel
- 4** LED Bulb & Tube
- 5** LED Wall Pack
- 6** LED Area Light

LED Downlight

LED Commercial
Downlight 5 inch

LED Commercial
Downlight 6 inch

LED Commercial
Downlight 6 inch & 8 inch

-
- 1** The ABOVE ALL downlights are free from glare due to our indirect LED and lens. The ABOVE ALL LED down light is suitable for all dry and wet locations. The uniform light output has a fast instant response start time, high CRI means superior light quality compared to fluorescent. Compatible with most commercial dimmers. Optional trim rings available in various colors. Available in wattages from 10 to 40 watts replacing incandescent, fluorescent and HID up to 150 watts.

LED Troffer/ LED Troffer Retrofit Kit

LED RT Troffer 2x2
LED DT Troffer 2x2

LED RT Troffer 2x4
LED DT Troffer 2x4

LED Troffer Retrofit
Kit-DL 2x2

LED Troffer Retrofit
Kit-DL 2x4

-
- 2** The ABOVE ALL troffer and troffer retrofit kits are suitable for general retail environments. The fixtures are a one piece and enclosed steel framed bracket. It is designed to upgrade fluorescent light fixtures to modern controllable maintenance free luminaires. Fully integrated reversible hinged assembly allows for rapid troffer conversion. Upgrade to modern full distribution architectural aesthetics providing controlled soft, very well uniform light distribution. Easy installation and no need to remove the existing fixture housing. Available in both 2x2 and 2x4 configurations.

LED Flat Panel

LED Flat Panel 2x2

LED Flat Panel 2x4

- 3** LED flat panel is designed for standard T-bar and narrow grid drop ceiling to replace fluorescent fixtures in offices, supermarkets, pharmacies, shop malls and other indoor applications. The edge-to-edge design enables even light distribution, simple but beautiful and easy for installation. Energy saving, long life span and low maintenance.

LED Bulb & Tube

- 4** LED A bulb Replacement Lamps with 270° omnidirectional beam angle are the ideal energy saving choices when upgrading traditional incandescent 25W, 40W, 60W, 75W and 100W. Simply install in your existing fixture and turn ON the savings.

LED PL Replacement Lamps are the ideal energy saving choices when upgrading traditional CFL PL. Universal voltage 120-270Vac.

LED PAR lamp Replacement Lamps are the ideal energy saving choices when upgrading traditional halogen PAR lamps.

LED BR lamp Replacement Lamps are the ideal energy saving choices when upgrading traditional halogen BR lamps.

LED Compatible T5 Tube(glass) Replacement Lamps are the ideal energy saving choices when upgrading traditional linear T5. It can be compatible with mainstream market F54T5/HO and F28T5/HE ballasts.

Dual Model Technology LED T8 Glass Tube are the ideal energy saving choices when upgrading traditional fluorescent linear T8. Universal voltage 120V-277VAC direct AC as well as compatible with electronic ballast.

LED T8 Glass Compatible Tube are the ideal energy saving choices when upgrading traditional linear. Compatible with electronic ballast.

LED T8 PC Direct Wire Tube are the ideal energy saving choices when upgrading traditional linear T8. Universal voltage 120V-277Vac. For use with non-shunted sockets only.

LED Full Cut-off LED Wall Packs are designed and engineered as maintenance free, energy efficient alternatives to traditional fluorescent, high/low pressure sodium, metal halide, induction, and other types of lighting fixtures.

LED Standard LED Wall Packs with new optics increase light output and efficacy to reduce shadows and create safe, brightly-lit outdoor environments in parking garages, entrances, public areas and all other outdoor areas in a retail setting.

LED V-Line & Slim Wall Pack are designed high quality die cast housing. Durable chip and fade resistant powder coat finish. Efficient design separates the driver from the LED to minimize heat, air cooling design of aerodynamic and modern appearance. Adjustable head for precise aiming.

Low Wattage LED Slim Wall Packs are designed and engineered as maintenance free, energy-efficient alternatives to traditional fluorescent, high/ low pressure sodium, metal halide, induction, and other types of lighting fixtures. Superior thermal design for longer life.

Leopard Series Mini Wall Pack series is designed to replace 70-150W MH luminaires while saving up to 88% in energy costs. The leopard series can be customized for virtually flood light and wall pack lighting application. This series is ideal for outdoor applications such as building perimeters, loading areas, driveway's, sign and building flood lighting.

The ABOVE ALL LED Security Lights are the ideal fixture for entrance ways, stairways, and storage areas. Featuring a classic form as well as a new modern form option which offers a unique appearance, both are powered by advanced LEDs. The ABOVE ALL LED Security Lights are powerful yet energy efficient, capable of replacing up to a 100W HID light source while saving energy costs. Integral Photocell is preinstalled for more efficient operation and energy savings.

LED Roadway
Light

5

The Model-T LED is a universal and scalable parking area LED luminaire. LED Model-T series is designed as a modern and aesthetically pleasing lighting system that offers high uniformity, excellent symmetric light distribution, reduced offsite visibility and on-site glare. It uses a diecasted aluminum housing and aerodynamic design. High quality outdoor powder coat finish.

The ABOVE ALL Area Lights are ideal for parking areas and other applications that require high quality energy efficient lighting. In 55W, 80W, 110W, 135W, and 300W replaces 70W to 1000W of Metal Halide and High Pressure Sodium light sources. Maintenance free and an extreme long life of 135,000 hours (L70).

The ABOVE ALL Roadway series is the result of a multi-disciplinary design study and applies the latest technologies developed by ABOVE ALL Engineers. The product's reliability and performance where the design motivation for the series and the results have been verified and tested by third party independent certified laboratories. The ABOVE ALL Technology provides significant advantages in terms of luminous efficiency, minimizing losses from refraction and reflection inside the optical system. This system ensures a lower density of dirt and maintaining the luminaire performance for a very long period.

SAVING **EXAMPLE**

Energy Savings:

At \$0.10 per kWh, energy savings is estimated at \$90 per fixture, based on saving approximately 200 Watts per fixture for 12 hours per day. If your facility has 48 outdoor fixtures (conservative for many retail establishments), this annualized savings would be \$4,320.

Maintenance Savings:

The average cost to maintain a typical outdoor fixture is \$100 (lamp cost + labor/trip charge). This does not factor in any inconveniences or service interruptions caused by unlit areas. Over the extended 100,000 space rated life of an LED fixture compared with an HID lamp, this saves approximately \$500 per fixture in labor. $48 \text{ fixtures} \times \$500 = \$24,000$.
