## MICROWAVE DIMMING SENSOR SETTING (ANT-3C)

Sensor data can be precisely set for each specific application by a remote controller which need to be bought separately.

### Sensitivity

Detection area can be reduced by selecting the combination on the remote controller to fit precisely each application.

Optional Setting: 100%/75%/50%/25%

Default Setting: 100%

### Hold time

Refers to the time period the lamp remains at 100% illumination after no motion detected.

Optional Setting: 10S/1min/5min/10min/15min/20min/30min/60min

Default Setting: 20min

### Stand-by time

Refers to the time period the lamp remains at a low light level before it completely switches off in the long absence of people.

When set to “+∞” mode, the low light is maintained until motion is detected.

Optional Setting: 1min/30min/60min/+∞

Default Setting: +∞

### Daylight sensor

The sensor can be set to only allow the lamp to illuminate below a defined ambient brightness threshold. When set to Disable mode, the daylight sensor will switch on the lamp when motion is detected regardless of ambient light level.

Optional Setting: 10lux/30lux/50lux/100lux/300lux/500lux/Disable

Default Setting: Disable

### Stand-by dimming level

The low light level you would like to have after the hold time in the long absence of people.

Optional Setting: 0%/10%/30%/50%

Default Setting: 30%

### NOTE:

1. If need ON/OFF function, please set the stand-by period in “0%” mode and please set the stand-by time into “1min” by the remote controller. Then the light will turn off after 1 minute in absence of people.
